SUMMARY

Game Developer with 5+ years of hands-on experience in building interactive and immersive experiences using Unity and C#. Skilled in both gameplay programming and technical problem solving, with a strong passion for creating smooth and scalable game systems. Additionally experienced as an Application Developer using Flutter, delivering clean and user-focused mobile applications. Also a 3D Artist, capable of producing optimized and visually appealing assets for games and interactive environments. Always eager to learn, improve, and contribute to impactful digital products.

EDUCATION

Bachelor of Computer Science & Mathematics

2022 - 2025

Faculty of science Helwan University

Grade: C+

- Studied programming principles and foundational computer science concepts.

Mobile application developer

Jun 2024 - Nov 2024

Information Technology Institution (ITI)

- Developed mobile applications and gained practical experience in app design and implementation.

WORK EXPERIENCE

Lead Game Developer - Chattok Gaming

Feb 2024 - Present

Developed, designed, and modeled more than 5 successful game titles, including Street Racing, Mud Monster, Zombie Hunters, and Ultimate Trivia.

- Built every game entirely from scratch using Unity and C#.
- Led the full development pipeline from concept to deployment.
- Played a key role in creating Chattok Gaming's innovative system that integrates live streaming with real-time interactive gameplay, where the audience's reactions directly affect the game.
- Designed and implemented the backend systems that made this real-time interaction possible, ensuring scalability and smooth live performance.

Game Developer - Freelancer

Apr 2022 - Present

Full-cycle Game Developer with 23+ satisfied clients and 28+ completed projects, each featuring unique concepts and distinct gameplay, providing wide experience across most major game genres.

- Delivered complete games from scratch, including 3D modeling, animation, and gameplay programming.
- Developed online and multiplayer games, including backend systems and real-time features.
- Built story-rich and narrative-driven experiences, focusing on player engagement and world-building.
- Adapted to different project scopes, deadlines, and client visions while maintaining high-quality delivery.

App Developer - FreelancerJul 2024 - Present

Developed cross-platform mobile apps using Flutter and Dart. Implemented responsive UIs, integrated REST APIs and Firebase. Optimized performance and ensured smooth UX on Android and iOS.

Data Entry Clerk - Covo ConnectJul 2023 - Dec 2023

- Performed data typing and entry tasks with accuracy and consistency.
- Achieved an average typing speed of 58 WPM.

3D Modeler - FreelancerMay 2022 - Present

Designed and modeled 3D assets for games, ensuring they are visually appealing, lively, and optimized for performance.
